Teaching Assistants and Section Meeting Times:

Course Objectives
This survey focuses on the historical evolution of the cultures, polities, and societies in the Indian sub-continent from the early modern to the post-colonial periods.

The chronological scope of the course includes: the consolidation and demise of the Mughal empire and the rise of the seventeenth- and eighteenth-century successor states; shifts in the structure and ideology of British rule and organized resistance to it, through anti-colonialism; and finally, key debates in postcolonial politics on the sub-continent. In brief, this is an introduction to South Asian history between the sixteenth and twentieth centuries.

No comprehensive introduction to such a large time period is possible. Rather, the course is structured around major themes and debates in the historiography of South Asia. Topics include: state formation; debates about colonial economy and underdevelopment; the development of anti-colonial thought; organized challenge to the nation-form by political minorities—Muslims, untouchables, and women; debates about violence and democracy; and about secularism.

- **Academic integrity**

The intellectual venture in which we are all engaged requires of faculty and students alike the highest level of personal and academic integrity. As members of an academic community, each one of us bears the responsibility to participate in scholarly discourse and research in a manner characterized by intellectual honesty and scholarly integrity.

Scholarship, by its very nature, is an iterative process, with ideas and insights building one upon the other. Collaborative scholarship requires the study of other scholars’ work, the free discussion of such work, and the explicit acknowledgement of those ideas in any work that inform our own. This exchange of ideas relies upon a mutual trust that sources, opinions, facts, and insights will be properly noted and carefully credited.
In practical terms, this means that, as students, you must be responsible for the full citations of others’ ideas in all of your research papers and projects; you must be scrupulously honest when taking your examinations; you must always submit your own work and not that of another student, scholar, or internet agent.

Any breach of this intellectual responsibility is a breach of faith with the rest of our academic community. It undermines our shared intellectual culture, and it cannot be tolerated. Plagiarism or dishonesty and unethical behavior is unacceptable and you will face punitive measures. Students failing to meet these responsibilities should anticipate being asked to leave Barnard, or Columbia.

-**Classroom Etiquette** constitutes best practices of your academic and social lives: be considerate in class; listen well; interact with respect and compassion; turn off your phone; and turn off your computing devices.

-**Disability-Related Accommodations:**
  In order to receive disability-related academic accommodations, students must first be registered with Disability Services (DS)Faculty must be notified of registered students’ accommodations before exam or other accommodations will be provided. Students who have (or think they may have) a disability are invited to contact Disability Services for a confidential discussion.
